

**Digvijay Pharmaceuticals (I) Pvt. Ltd.**

## **Caralluma Fimbriata**

## **Uses & Benefits**

### **Weight Loss**

It is believed that pregnane glycosides play a part in why Caralluma Fimbriata is able to prevent fat accumulation by blocking citrate lyase. It has hydroxycitrate (HCA) (10) which has been proven to contribute to weight loss in humans without stimulating the central nervous system.

It has components that affect the appetite control center of the brain. It is believed to have an inhibitory effect on the sensory mechanism of the hypothalamus.

It also has fat burning properties.

### **Anti Arthritic**

It has anti-rheumatic and anti-arthritic effects. There is also a notable enhancement in the HDL/LDL blood ratios along with controlling joint tenderness in other parts.

### **Skin improvement**

Used for Appetite Suppressant and Weight control supplement

It contains saponins which are cleansing agents, helping combat acne, oily skin and scalp. This extract helps relieve dermatitis, eczema and dandruff. It is an antioxidant, rejuvenating skin cells.
